

## **MICROBLADING**

by Heather Escobar  
Esthetician  
Certified Microblade Artist

Microblading is a semi-permanent make-up procedure that enhances or creates eyebrows. Instead of the traditional eyebrow tattoo, microblading is very small hair like strokes which makes your brows look very natural. Traditional permanent make-up uses a hand held machine that forces pigment deep into the Dermis, this procedure uses a small hand held tool that places pigment into the second layer of the Epidermis. Also a very high quality cream pigment is used instead of the traditional liquid form, and typically lasts 18 months to two years.

This procedure has been very popular in Asia for the last 30 years, hit Europe about 10 years ago and now within the past 3 years has taken the U.S. by storm. There are many other reasons **microblading** could be the answer to your brow problems: sparse brows, very light or a health condition that has caused hair loss. So make an appointment for a consultation today so we can get those bold, beautiful, brows back!! \$450 Includes consultation, treatment, 30 day f/u touch-up.
